

CASEBOOK • DOCTOR-WISE EMR
UNIFIED DIGITAL ECOSYSTEM

CASEBOOK BY CLINEXGEN

One record per doctor, per patient, per visit.

A doctor-wise EMR for clinics and individual practices. No more searching for the last visit: it is already on screen.

WHAT CHANGES · FOUR MEASURES, BEFORE AND AFTER

BEFORE	AFTER
See more patients The last visit, prescription and report are already on screen. Patients seen per session	Cut consultation admin Each doctor's own templates: no rewriting. Minutes per routine follow-up
Stop losing follow-ups Next-visit dates become a list of the dates due. Share of follow-ups who return	Know where money comes from Billing, refunds and referral payouts per visit. Minutes to close the day's cash

Measured, not promised. The baseline comes from your own numbers, measured again in a 14-day trial on your own data.

HOW IT WORKS · EVERY STEP WRITES INTO THE NEXT

Organised doctor-wise. A doctor opening a patient sees their own record first, with the practice-wide history alongside. Nothing is typed twice.

Who it is for: doctors, clinics and practices with no in-patient beds, from one doctor to several clinics. Running beds? **Nucleus**, for clinics and hospitals up to 100 beds; above 100 beds, **Nalam360**.

THREE EDITIONS, ONE RECORD

Standard	Professional	Enterprise
One doctor, one clinic	Several doctors, one clinic	Several doctors, several clinics
The full clinical record, appointments, billing, lab queue, core reports	Adds financial reporting, and reversals and corrections	Adds every clinic on one system, each clinic's data kept separate, and priority support

Your proposal sets out the edition that fits; moving up keeps every record where it is.

BUILT FOR TRUST

-  Rights per screen and per action
-  A locum sees only their role's screens
-  Audit trail on every clinical entry
-  Our cloud in India, or your own server
-  99.5% uptime and twice-daily backups, on our cloud
-  Yours on exit: a 60-day export, then deletion

16 of 20 capabilities live today (verified 2 September 2026); ABHA / ABDM linking, revenue by doctor and the apps are In delivery. **Under the DPDP Act, 2023 you stay the data fiduciary.** On your own server, uptime and backups are agreed in the proposal. No security certification is claimed.

NEXT STEP

See Casebook run on your own practice

-  **Live consultation**
this week, your own test patient
-  **Specialty review**
your forms and templates
-  **14-day trial**
on your own data
-  **Your proposal**
the edition that fits
-  **Go-live**
weeks 1 to 5, from signing
