

SEVEN PRODUCTS • ONE PARTNER
UNIFIED DIGITAL ECOSYSTEM

AT A GLANCE

One partner for the systems your organisation runs on

Clinexgen Private Limited is a Chennai-based, AI-enabled software development and consulting company, established in August 2026. We build digital systems that bring domain-specific AI and strategic consulting together, so that change reaches the operating floor, not just the roadmap.

Aug 2026

50+ years
 combined founding experience

7 products
 healthcare and enterprise

Live today
 Nalam360 at a Chennai hospital

DPIIT-recognised start-up under Startup India

THE CHALLENGE

Most organisations run on systems never built to work together

Data keyed twice
 The same patient, sample or invoice typed into two or three systems.

A vendor for every department
 Clinical, laboratory, sales and accounts each bought and renewed separately.

Paper in the gaps
 Registers, spreadsheets and chat groups fill the steps no system covers.

Reports after the fact
 Figures arrive at month-end, after the moment to act has passed.

AI that stays in the demo
 Pilots that never reach the ward, the field team or the ledger.

Compliance by effort
 Returns, audit trails and consent records kept up by hand.

TYPICALLY TODAY

Islands of software

WITH CLINEXGEN

One record, one standard

Our answer: one platform, seven products, one engineering standard and one accountable partner, so you add systems without adding vendors.

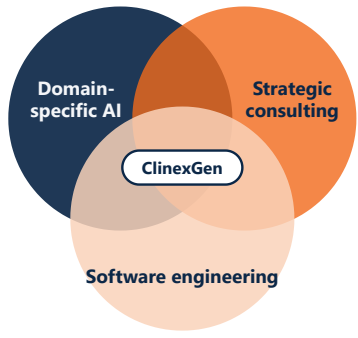

WHO WE ARE

A new company, built by a founding team with 50+ years' experience

Technocrat
 Technical knowledge

Industry leader
 Strategic insight

Marketing professional
 Market acumen

Where all three meet is where we work: systems that automate processes, connect data and show a measurable return.

A founding team, not a first attempt. Together they bring the discipline of an established company to a new one, so that systems land against a business case and not a specification alone.

VISION, MISSION AND VALUES

VISION · WHERE WE ARE GOING
 To be a trusted partner in building resilient, compliant and optimised digital ecosystems, aligning domain-specific AI with strategic consulting to deliver a measurable return.

Resilient
 Compliant
 Optimised
 Measurable

MISSION · HOW WE GET THERE
 To build ecosystems that help businesses operate smarter and faster, with advanced AI, strong data protection and every engagement tied to measurable outcomes.

Advanced AI
 Data protection
 Measurable outcomes

Innovate
 Domain-specific AI aimed at the operating problem

Integrate
 Systems connected on one record, not re-keyed

Elevate
 Outcomes measured, reported and improved

OUR PRODUCTS

One platform, seven products, three verticals

Every ClinexGen product shares one engineering standard, one security posture and one support desk. An organisation that runs one of them adds the next against the same relationship.

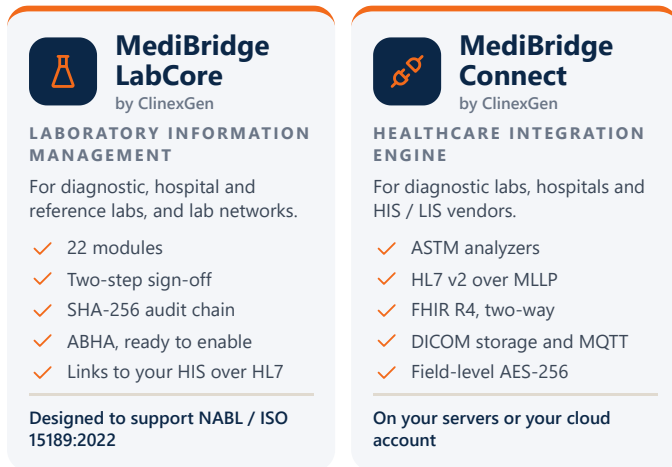

HEALTHCARE · CLINICAL AND CARE

From one doctor to a hospital group, on one family of products

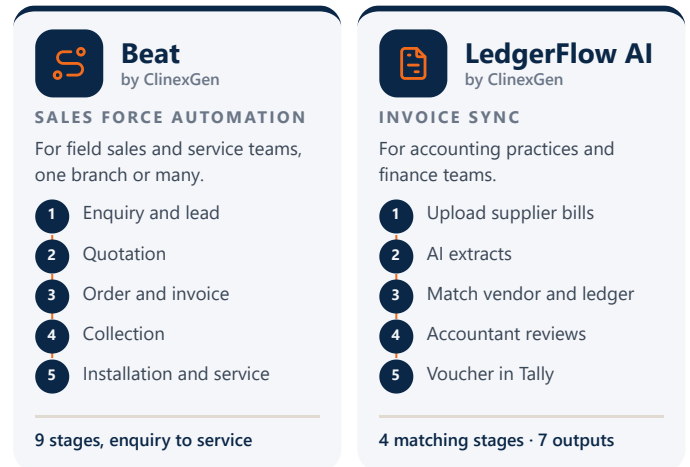

HEALTHCARE · LABORATORY AND INTEGRATION

Analyzers connected, every result traced

ENTERPRISE OPERATIONS · SALES AND FINANCE

Sales and the books, each run end to end

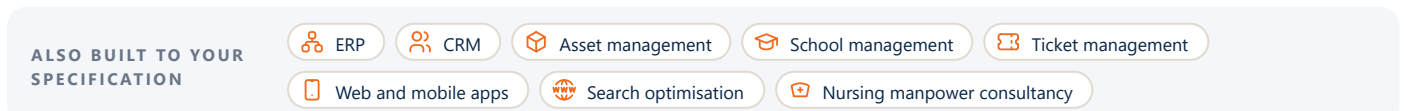

YOUR STARTING POINT

Find your starting point in three questions

Already running one ClinexGen product? Add the next against the same relationship and the same support desk.

TECHNOLOGY

One engineering standard under every product

Your teams

Each sees only what their role needs

- Front desk
- Clinicians
- Lab staff
- Field sales
- Accounts
- Management

Seven products

Start with one, add the next

- Casebook
- Nucleus
- Nalam360
- MediBridge LabCore
- MediBridge Connect
- Beat
- LedgerFlow AI

Shared foundation

The same in every product

- Role-based access
- Audit trail
- Backups and recovery
- Dashboards and reports

Your choice of hosting

Confirmed in your proposal

- ClinexGen cloud
- Your own servers

AI WHERE THE DOMAIN IS, PEOPLE IN CONTROL

AI reads

AI proposes

People approve

In LedgerFlow AI it reads supplier bills and proposes the match; an accountant approves before anything reaches the books.

CONNECTS TO WHAT YOU ALREADY RUN

Tally

Approved vouchers from LedgerFlow AI

ABDM and ABHA

In Nalam360 and MediBridge LabCore, ready to enable

Lab analyzers

MediBridge Connect links them to the LIS

Mobile in the field

Beat call reports from the phone

HOW WE ENGAGE

Four steps, one relationship, results measured on your own data

01

Discover

The operating problem and baseline measures

02

Design

Modules mapped; fit and gap on your data

03

Deploy

Set up, migrate, go live one site at a time

04

Support

One desk and one escalation path

THEN

Grow

The next edition or product, same record

Measured, not promised. A baseline from your own reports, a pilot on your own data, and a before-and-after report. Direct, or through an accredited partner, with the same standard and the same support desk.

EDITIONS

Three editions

Enterprise

All of it, across sites and entities

Professional

More depth, on the same record

Standard

The core, for one site or practice

BUILT FOR TRUST

The same safeguards in every product

Role-based access

Rights by site and by role

Audit trail

Every change, against its user

Backups and recovery

Terms written into your proposal

Your data stays yours

You remain the DPDP data fiduciary

Yours on exit

Export, then a deletion certificate

No borrowed badges

No certification we do not hold

Five products come in three editions. MediBridge LabCore and MediBridge Connect are scoped by the modules and interfaces you switch on. **Moving up switches features on;** every record stays where it is.

TOLD WHAT SHIPS

Live

Nalam360 at a working hospital

In delivery

Being readied: video consultation

Roadmap

Planned, never sold as ready

NEXT STEP

Start with one system, or the whole ecosystem

Working session

On your data, not a scripted demo

Fit and gap

One page, yours to keep

Your proposal

Edition, modules and plan

Pilot

Time-boxed, on one site

Every product has its own deck; five also have a brochure, flyer and process flowchart. Ask for the ones that match your starting point.
