

CORPORATE PROFILE

UNIFIED DIGITAL ECOSYSTEM

A new company, built by a founding team with 50+ years' combined experience

Clinexgen Private Limited is a Chennai-based, AI-enabled software development and consulting company, established in August 2026.

A founding team, not a first attempt

Technocrat

Technical knowledge

Industry leader

Strategic insight

Marketing professional

Market acumen

Live today

Nalam360 in daily use at a hospital in Chennai

50+

years of combined experience

The discipline of an established company, in a new one.

OUR CORE OFFERINGS

Software products

Seven products in three verticals, on one engineering standard, one security posture and one support desk.

- Healthcare
- Enterprise operations

Domain-specific AI

AI inside the workflow it belongs to, with people approving what it proposes.

LIVE In LedgerFlow AI today

Strategic consulting

Consulting beside the build, so each system lands against a business case.

- Business case
- Fit and gap
- Measured outcomes

EXECUTIVE SUMMARY

VISION

Where we are going

To be a trusted partner in building resilient, compliant and optimised digital ecosystems, aligning domain-specific AI with strategic consulting to deliver measurable ROI, accelerate innovation and create sustainable enterprise value in the digital era.

MISSION

How we get there

To build powerful ecosystems that help businesses operate smarter and faster. We apply advanced AI, uphold strong data protection and tie every engagement to measurable outcomes, so that companies automate processes, connect systems and achieve meaningful impact.

OUR CORE VALUES

Customer centricity and measurable impact

Expertise and smart innovation

Stakeholder trust and uncompromising security

Most organisations run on systems that were never built to work together

Data keyed twice

The same patient, sample or invoice typed into two or three systems.

A vendor for every department

Clinical, laboratory, sales and accounts each bought, supported and renewed separately.

Paper in the gaps

Registers, spreadsheets and chat groups fill the steps no system covers.

Reports after the fact

Figures arrive at month-end, after the moment to act has passed.

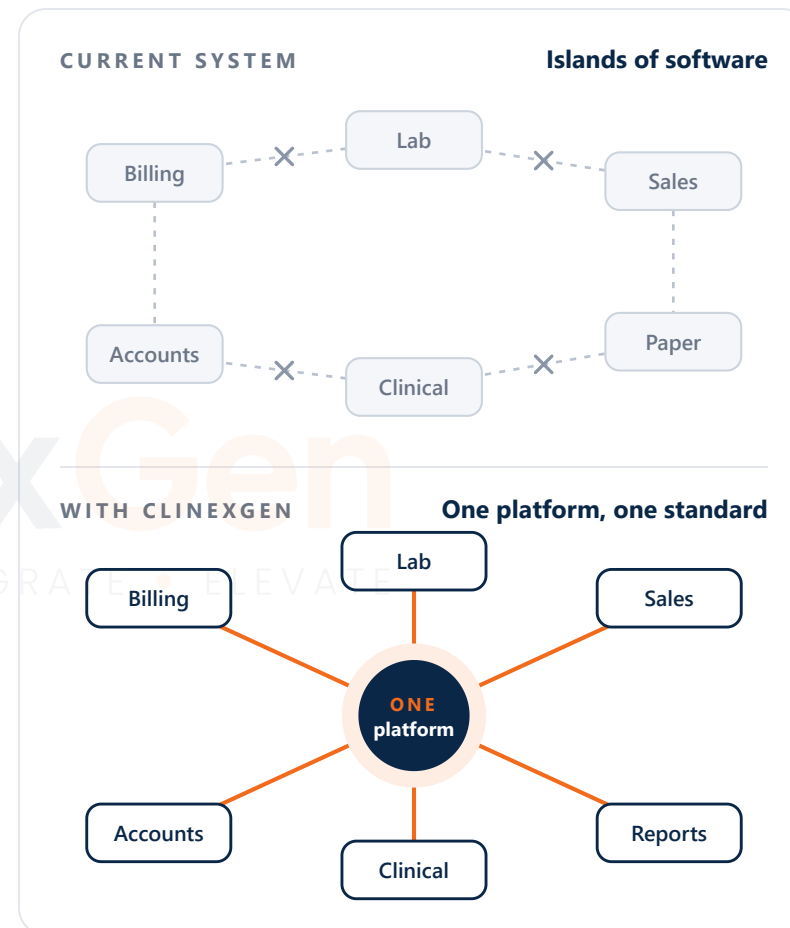

AI that stays in the demo

Pilots that never reach the ward, the field team or the ledger.

Compliance by effort

Statutory returns, audit trails and consent records kept up by hand.

Our answer: one platform, seven products, one engineering standard and one accountable partner, so you add systems without adding vendors.

Our products · p. 04

One platform, seven products, three verticals

Every ClinexGen product shares one engineering standard, one security posture and one support desk. An organisation that runs one of them adds the next against the same relationship.

From one doctor to a hospital group, on one family of products

**Casebook**
by ClinexGen

DOCTOR-WISE EMR

Built for doctors and clinics, from one doctor to several clinics.

-  Case sheet and form builder
-  Prescriptions and certificates
-  Appointments and billing
-  Lab queue and reports

 The full clinical record in every edition

**Nucleus**
by ClinexGen

CLINIC AND HOSPITAL

Built for clinics with beds and hospitals up to 100 beds.

-  Front office and queue
-  Clinical record and MRD
-  In-patient and theatre
-  OP and IP billing

 Appointment to final bill on one record

**Nalam360**
by ClinexGen

HOSPITAL INFORMATION

● Live at a Chennai hospital

Built for multi- and super-speciality hospitals and groups.

-  ICU and theatre charting
-  Lab, radiology, blood bank
-  IP billing, insurance, TPA
-  Multi-branch operation

 122 modules · 8 role dashboards

Every analyzer connected, every result traced to the signed report

MediBridge LabCore runs the clinical laboratory end to end. MediBridge Connect moves each clinical message between analyzers, HIS / EMR and FHIR systems, so nobody re-types a result.

LABORATORY INFORMATION MANAGEMENT

MediBridge LabCore

Built for diagnostic, hospital and reference laboratories, and laboratory networks.

Designed to support NABL / ISO 15189:2022

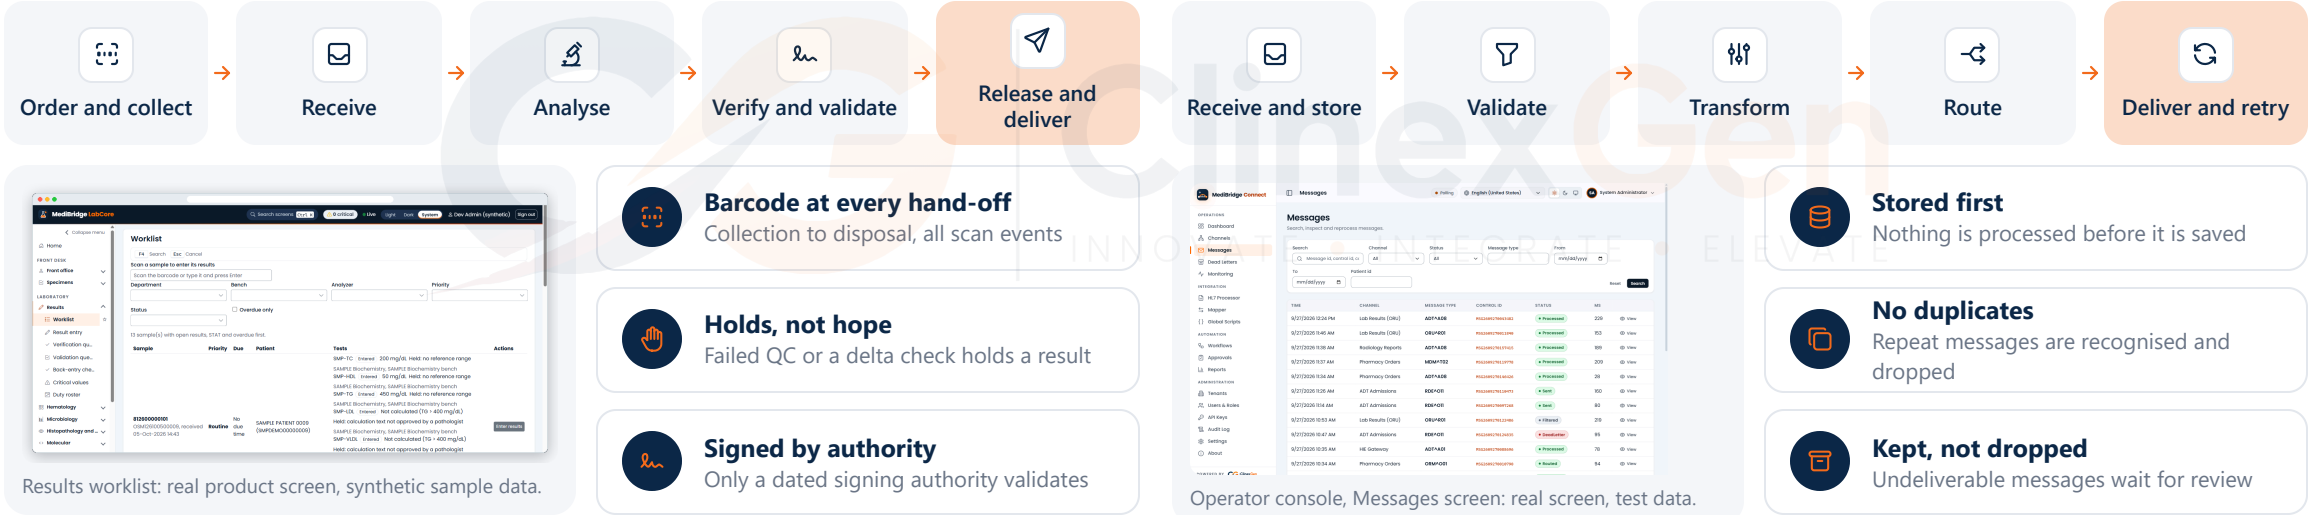

HEALTHCARE INTEGRATION ENGINE

MediBridge Connect

Built for diagnostic labs, hospitals and HIS / LIS vendors.

On your servers or your cloud account

22 modules

2-step sign-off

SHA-256 audit chain

ABHA ready to enable

ASTM analyzers

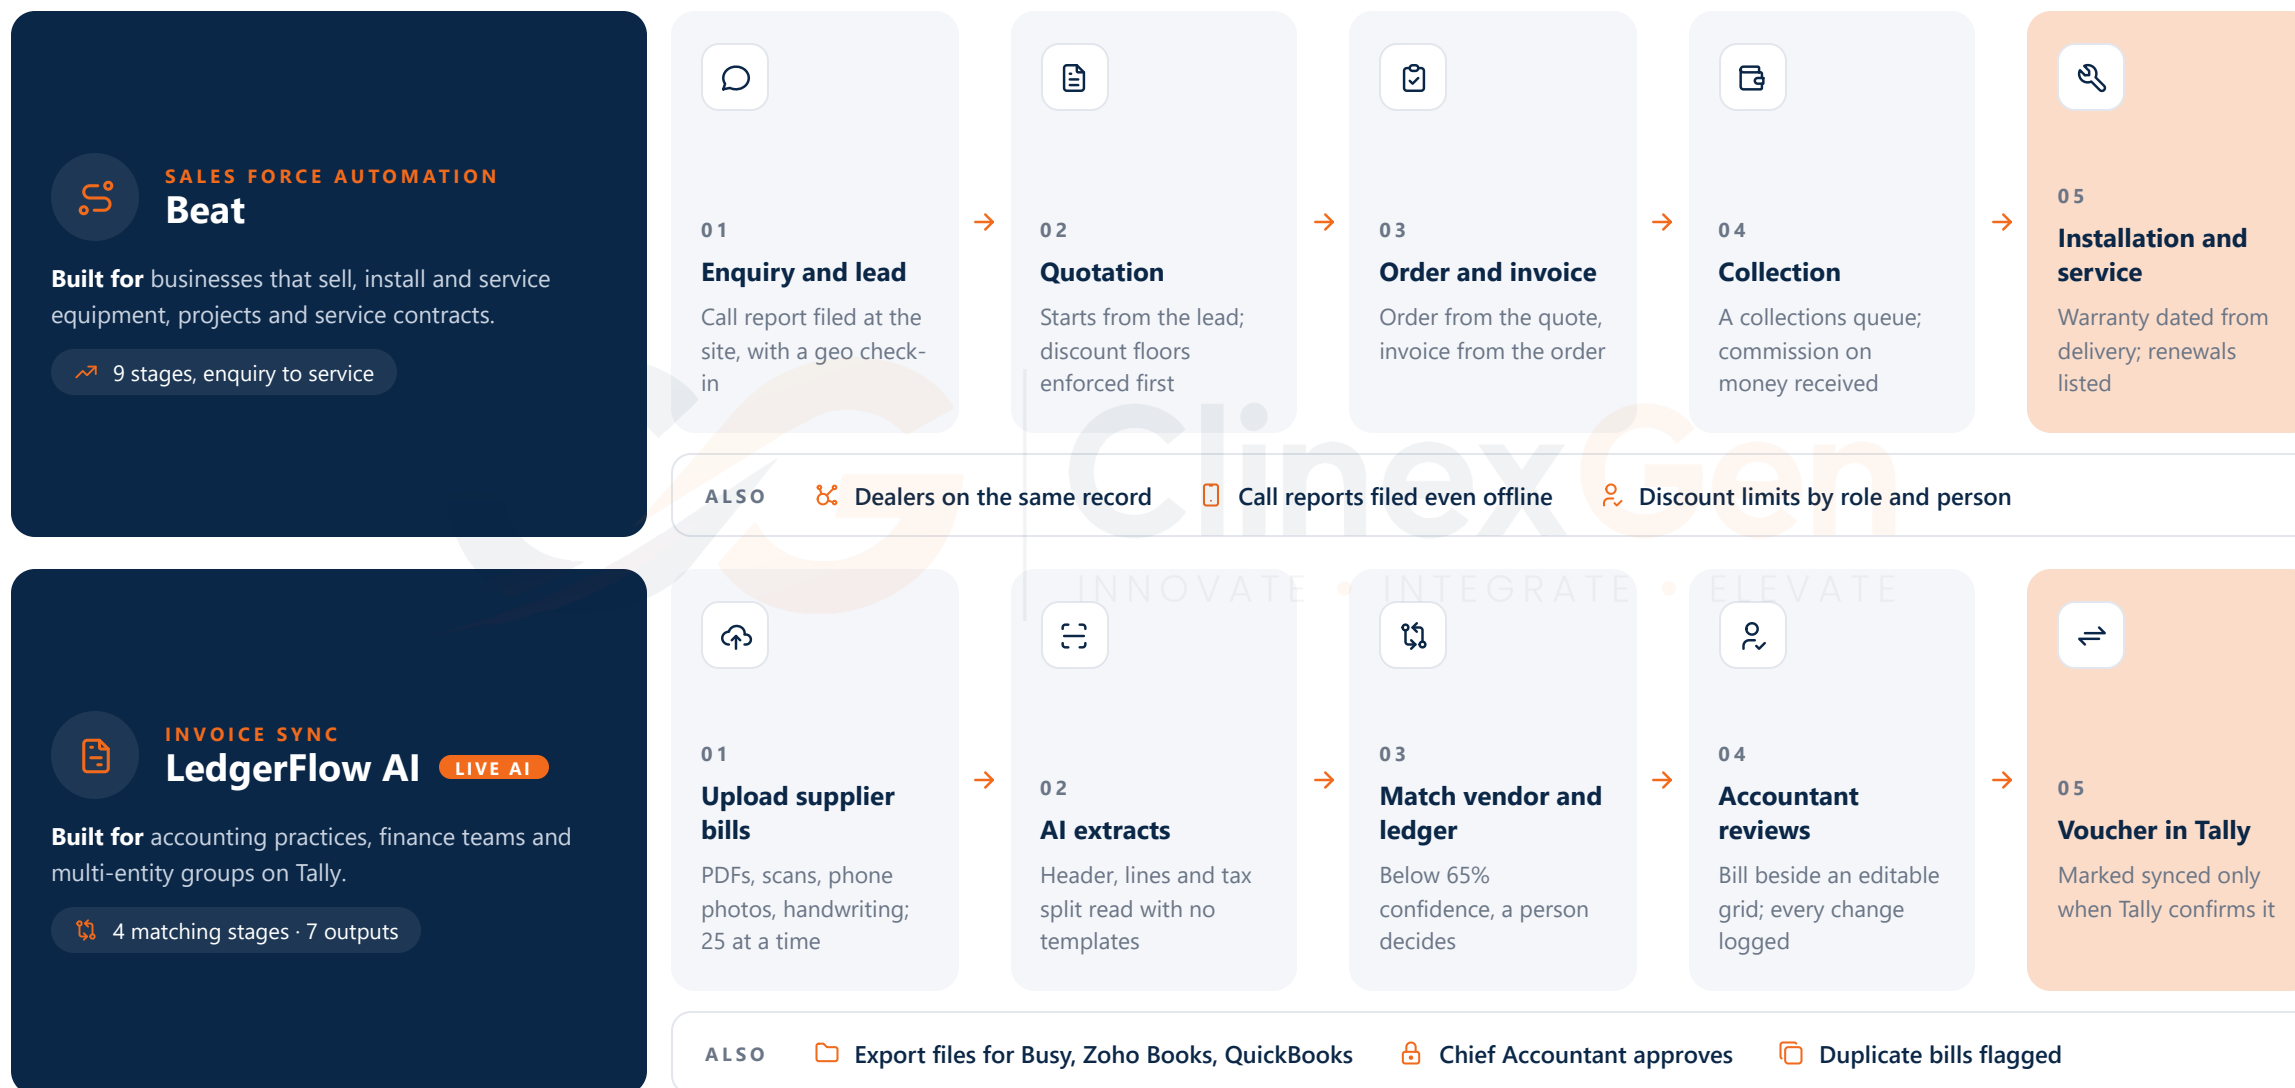

HL7 v2 2.3 to 2.5.1

FHIR R4 two-way

AES-256 field-level

Together: analyzer results reach MediBridge LabCore through MediBridge Connect, and LabCore exchanges orders and results with your HIS over HL7.

Sales and the books, each run end to end on one record

Three editions: start small, switch on more as you grow

Five products come in three editions. MediBridge LabCore and MediBridge Connect are scoped by the modules and interfaces you switch on.

PRODUCT	Standard The core, for one site or practice	Professional More depth, on the same record	Enterprise All of it, across sites and entities
 Casebook	One doctor, one clinic	Several doctors, one clinic; adds financial reporting	Several doctors across several clinics
 Nucleus	Front office, clinical record, in-patient, theatre, billing	Adds laboratory, pharmacy and insurance or TPA	Adds financial analysis, statutory pack, 24×7 critical cover
 Nalam360	Multi-speciality core, one hospital	Adds super-speciality depth, one hospital	Several hospitals or branches, group reporting
 Beat	Field force and pipeline: call reports, beat plans, leads	Adds quotation to cash, tenders, targets, incentives	Adds stock, installed base, service, partners, branches
 LedgerFlow AI	A single-book practice, or a first run on your own bills	Working practices and mid-size finance teams	Multi-entity groups and outsourced accounting firms
 Moving up switches features on. Every record stays where it is.			 Your commercial proposal sets out the edition that fits.

One partner for the systems your organisation runs on

A unified digital ecosystem, with domain-specific AI and strategic consulting beside every build.

01

One engineering standard

Every product built, secured and supported the same way, so the next one adds capability, not complexity.

- ✓ Seven products on one standard
- ✓ Role-based access, audit trail and backups in each
- ✓ Start with one, add the next on the same terms

02

One security posture

Strong data protection is a precondition of every system we ship.

- ✓ Each team sees only what its role needs
- ✓ Every change on an audit trail
- ✓ You remain the data fiduciary under the DPDP Act, 2023

03

One support desk

One desk and one escalation path for every ClinexGen product you run.

- ✓ Service levels written into your proposal
- ✓ 24×7 critical cover where your edition includes it
- ✓ The same desk as you add products

BESIDE EVERY BUILD

Domain-specific AI inside the workflow, with people approving

Strategic consulting so each system lands against a business case

THREE WAYS TO WORK WITH US

Every way: The same product, the same standard and the same support desk. Partner terms are set in the partner agreement.

DIRECT

The ClinexGen team

Engages, delivers and supports your account: one point of accountability.

THROUGH A PARTNER

An accredited partner

Where local presence and established relationships matter most.

UNDER YOUR OWN BRAND

A white-label partner

Software and IT companies offer ClinexGen products under their own brand; ClinexGen builds, hosts, updates and secures the platform.

AI with people approving, your history kept, compliance built in

ClinexGen is an AI-enabled software development company, always moving towards state-of-the-art technology.

AI AUTOMATION AND TECHNOLOGY

AI where the work happens, with people approving

AI reads → AI proposes → People approve

LIVE LedgerFlow AI reads PDFs, scans, phone photographs and handwritten bills, up to 25 at a time.

LIVE Vendors are matched in four stages. Below 65% confidence a person decides, and every edit is logged.

Every new capability is labelled Live, In delivery or Roadmap, so you buy what exists.

AUTOMATION THAT CONNECTS TO WHAT YOU RUN

Tally

LedgerFlow AI posts approved vouchers

Lab analyzers

MediBridge Connect links them to the LIS

Your HIS

MediBridge LabCore links to it over HL7

In the field

Beat call reports filed from the phone

DATA AND MIGRATION

Change your system. Keep your history.

Audit and extraction

What exists, where, and how clean

YOUR SIGN-OFF

Mapping and validation

Your heads check samples against the source

YOUR SIGN-OFF

Staged go-live

One department at a time, on a plan

YOUR SIGN-OFF

Post-migration audit

Counts and balances reconciled to your totals

WHAT MOVES

• Patients

• Balances

• Stock

• Tariffs

• Lab test masters

• Customer records

Every record counted in both systems, every difference explained.

COMPLIANCE BUILT IN

Kept up by the product

Statutory and regulatory work handled inside the product, not kept up by hand.

ABDM and ABHA

In Nalam360 and MediBridge LabCore, ready to enable

NABL / ISO 15189:2022

MediBridge LabCore is designed to support it

Tamper-evident audit trail

Hash-chained in MediBridge LabCore

Tax checks before posting

LedgerFlow AI checks the tax ID, flags duplicates

DPDP Act, 2023

You remain the data fiduciary, audited from the first extract

Thank you

Let us walk through the portfolio against your operating problem.
