

MEDIBRIDGE LABCORE • LAB INFORMATION SYSTEM
UNIFIED DIGITAL ECOSYSTEM

MEDIBRIDGE LABCORE BY CLINEXGEN

Every sample, result and decision, in one traceable place.

A laboratory information management system for diagnostic laboratories, hospital labs and laboratory networks in India: registration, barcoded samples, analyzers, validated results, signed reports, quality and billing in one system.

WHAT CHANGES IN YOUR LABORATORY · MEASURED ON YOUR OWN DATA

No more re-typed results

Analyzer results arrive through MediBridge Connect instead of being copied from printouts.

Every tube accounted for

Scanned at every hand-off. A rejected sample plans its own recollection with a new barcode.

Every critical value closed

Timed, escalated through your duty roster and recorded with a confirmed read-back.

Turnaround you can see

TAT by stage (median and 90th percentile), measured before and after on your own data.

Evidence for your assessor

QC, CAPA and critical-call evidence drawn from system records, not from files.

Measured, not promised

A baseline from your own data, a parallel run, then before and after compared.

HOW IT WORKS · EVERY HAND-OFF A SCAN, EVERY DECISION SIGNED

Order and collect

Patient, orders, barcode labels

Receive

Scan-to-receive, checks, rejection

Analyse

Analyzer results via MediBridge Connect

Verify and validate

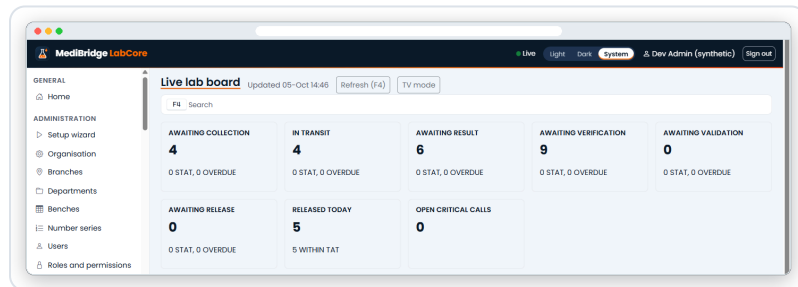

Technical check, then pathologist sign-off

Release and deliver

Signed PDF/A report to HIS, portal, app, print

HUMAN GATE

Live lab board: every stage of every sample, at a glance. Product screen, synthetic sample data.

WHO IT'S FOR

Standalone diagnostic labs

Hospital laboratories

Laboratory chains and franchises

Reference and specialty labs

Every laboratory gets the full module library; switch on what you need. Your proposal sets out the modules and interfaces.

BUILT FOR TRUST

Designed to support NABL / ISO 15189:2022 workflows

SHA-256 hash-chained, tamper-evident audit trail

DPDP requests tracked with due dates and escalation

ABHA / ABDM ready to enable once your HIP registration and sandbox validation are done

No reference range or critical limit ships pre-filled; your pathologists approve every master.

NEXT STEP

See LabCore on your own workflow

Live demo

On your own workflow

Fit and gap

Test menu, analyzers, HIS, branches

Trial on your data

14-day parallel run, one branch

Proposal

Scope, modules, interfaces

Rollout

Go live, then branch by branch
