

NUCLEUS • CLINICS & HOSPITALS
UNIFIED DIGITAL ECOSYSTEM

NUCLEUS BY CLINEXGEN · UP TO 100 BEDS

The bill comes from the care, not a second entry.

One record from appointment to final bill. Every charge lands on the stay as it happens, and every receipt, refund and reversal is stamped with user, branch and shift.

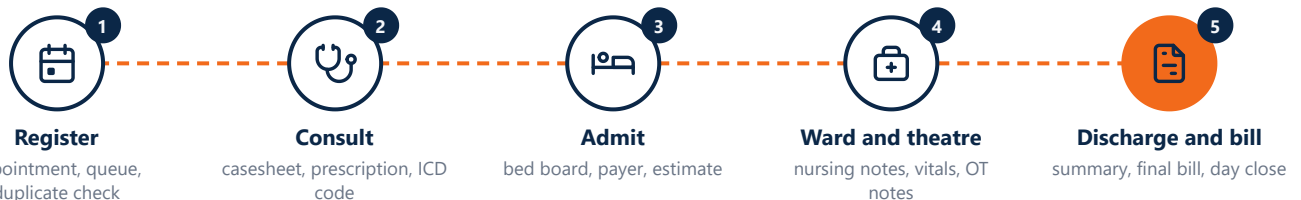

WHAT CHANGES · FOUR MEASURES, BEFORE AND AFTER

 Billing leakage Orders, issues, bed days and theatre charges, against the lines on the final bill. BEFORE ----- AFTER -----	 Day close Hours it takes, and receipts against the bills collected, shift by shift. BEFORE ----- AFTER -----	 Claim rejections Claims prepared from the complete stay, matched to the final bill. Professional and above. BEFORE ----- AFTER -----	 Bed turnaround From the final bill to the bed freed on the bed board. BEFORE ----- AFTER -----
--	---	---	---

Measured, not promised. The baseline comes from your own reports, and the same four are measured again after 30 days live in one department.

HOW IT WORKS · ONE RECORD, FROM APPOINTMENT TO FINAL BILL

 **Nothing is keyed twice:** one identity, one tariff, one rights model. On Professional and above, lab and pharmacy reach the same bill.

 **Who it is for:** clinics and hospitals up to 100 beds; out-patient and in-patient care on one record. No in-patient beds? **Casebook**. Above 100 beds, or ICUs and several super-specialties? **Nalam360**, assessed at fit and gap.

THREE EDITIONS, ONE RECORD

Standard

Front office, clinical record, wards and theatre, billing and day close, operational and collection reports

Professional

Adds lab, pharmacy, and insurance and TPA claims on the same order and bill

Enterprise

Adds financial analysis, the statutory report pack, the reversal console and 24×7 critical cover

Stores and blood bank can be added to any edition. Your proposal sets out the edition that fits; moving up keeps every record.

BUILT FOR TRUST

-  Rights per screen and per action
-  Hospital and branch isolation
-  Activity log and approvals
-  ABDM / ABHA built, ready to enable
-  India cloud, or your own servers
-  Yours on exit: 60-day export

Under the DPDP Act, 2023 you stay the data fiduciary. Records are ICD-coded and NABH-ready; we claim no ISO 27001 or NABH certification.

NEXT STEP

See Nucleus on your own tariff and forms

-  **Working session**
90 minutes, one test patient
-  **Fit and gap**
one page, yours to keep
-  **14-day trial**
on your own data
-  **Your proposal**
the edition that fits
-  **Pilot**
one department, 30 days live
